USA Judo permits any junior age athlete, including all categories from Bantam through IJF Junior, who is in the last six months of his or her eligibility, leading up to December 31 of that year, to compete in a given age bracket, to CHOOSE to enter USA Judo Elite Athlete Roster point events in the next age bracket. That athlete will NOT be able to compete in his or her "own" age bracket and the "new" one at the same event. Instead, he or she will need to choose ONE age bracket for each point event in the second half of each application year. The athlete who chooses to compete in the older category may begin to accumulate points in the new category beginning July 1 of each year, BUT he or she will not be able to use those points in the new division until January 1 of the year that actually ages them into the new division.

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluation for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions in your athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.

By my name and signature below, I acknowledge in accordance with Public Acts 342 or 2012 that I received and reviewed this concussion educational material.
